WORK EXPERIENCE

Beno Technologies   Dubai, UAE
Software Engineer (Internship)   Jun 2023 – August 2023
- Utilized Swagger Coverage Tester to enhance OpenAPI code coverage, optimizing application reliability.
- Developed an innovative GPT-powered app generating test cases from JSON/YAML, elevating test coverage by 25%.
- Created an automated customer engagement solution using MJML, AWS Lambda, and FreshSales to boost efficiency.

IO21   Dubai, UAE
Software Engineer (Freelance)   Aug 2022 – Dec 2022
- Developed a navigation system using Flutter for Android which increased customer satisfaction by over 20%.
- Optimized backend solutions for a web and mobile application to improve data storage and retrieval.
- Collaborated with fellow teammates to create a Flutter and Unity integration.

Murdoch University Dubai   Dubai, UAE
Undergraduate Teaching Assistant   Sep 2021 – Jun 2022
- Tutored first-year students in C Programming skills by assisting them in practical coursework.
- Prepared weekly materials to help understand concepts.

PROJECTS

Mindmemo – Cyclic Project Reminder   ReactJS, NodeJS, GCP
- Designed and implemented a web application that allows management of cyclic projects.
- Implemented tasks and sub-tasks within projects, note creation, and an email reminder system.
- Received excellent feedback from the client for the application.

Quicknote – Notes Application   Flutter, Firebase
- Designed and implemented a lightweight Android notes application.
- Allows creating, editing, deleting, and searching for notes in a user-friendly layout.
- Integrated the app with Firebase Realtime Database for cloud storage.
